

## Who We Are

We are a family-owned and operated full-service facility on a quiet 30 acres in the country. We specialize in boarding retired horses and horses that are laid up due to injury. We also live on the premises.

## Trail's End Enviornment

All horses are treated like family. Horses have all-day turnout (weather permitting) in small groups with friendly companions. Pasture turnouts have grass and water in the summertime and hay and warm water in the wintertime. Paddock turnouts have hay and water year-round. We grow our own hay and maintain a trail around the field and in the adjacent woods.

## Services We Provide

- Hay is fed 3x a day
- Water checked 2x a day
- Grain 2x a day
- Medications and supplements given to horses as needed
- All horses are monitored daily
- Photos can be provided; however, we are not too far to visit!

## Medical Care

The owners have medical training. Our vet, farrier, and dentist all live within 10 miles of our facilities and are available on call. We will meet the farrier, vet, and dentist for you if you wish.
